Dear Sir/Madam:

I have been a subscriber to XM Satellite Radio since December 2003. I am a very satisfied subscriber. Satellite radio provides quality and a host of different programs. For example, I enjoy country music. However, there is not one country music station in the NYC area (the last one changed its format well over 2 years ago). XM Radio provides 5 or 6 stations with country music.

The National Association of Broadcasters should not dictate what paying subscribers are permitted and want to hear. As such, I respectfully request that the FCC reject "NAB's" petition 04-0160 and support satellite radio's ability to provide programming that we demand and deserve.

Thank you for your attention.
